

Tech Verticals & Progress Updates

Q1 2024

Realio is a **blockchain-based digital private equity firm** providing a platform for **creating, managing, and investing in digital assets**.

Realio's platform **utilizes blockchain technology** to offer a range of services, including tokenization, digital asset issuance, and secondary market trading. It also hosts a variety of applications, including Districts and forthcoming Freehold wallet.

Realio **aims to democratize access to alternative investments** by providing a platform for asset owners to create and manage digital securities, and for investors to trade those securities on a secondary market. Realio's platform also includes features such as KYC/AML compliance, investor accreditation, and investor management tools.

Realio's mission is to **create a more efficient and transparent financial system** that empowers investors and issuers.

Realio Mainnet v0.9.0 upgrade: Multistaking

SOFTWARE UPGRADE PROPOSAL

DESCRIPTION

This is the upgrade proposal of Realio Network with version v0.9.0, which enable multistaking feature.

PASSED

RWA Enabled Staking

- Validators & Delegators voted to pass Prop 7, which enables the multistaking module on the Realio Network.
- Originally, the Network was created as a dual-staking Network for \$RIO and \$RST only. With this upgrade, we can now support various types of tokens, including RWAs, evolving the Network to the interchain.
- This creates an ecosystem built for RWAs, secured by RWAs.

app.realio.network

Realio Network DApp

Staking & Governance

Live

-  5.9+ million blocks processed
-  49+ validators and growing who are bonding \$RIO and \$RST
-  55 million RIO/RST bonded

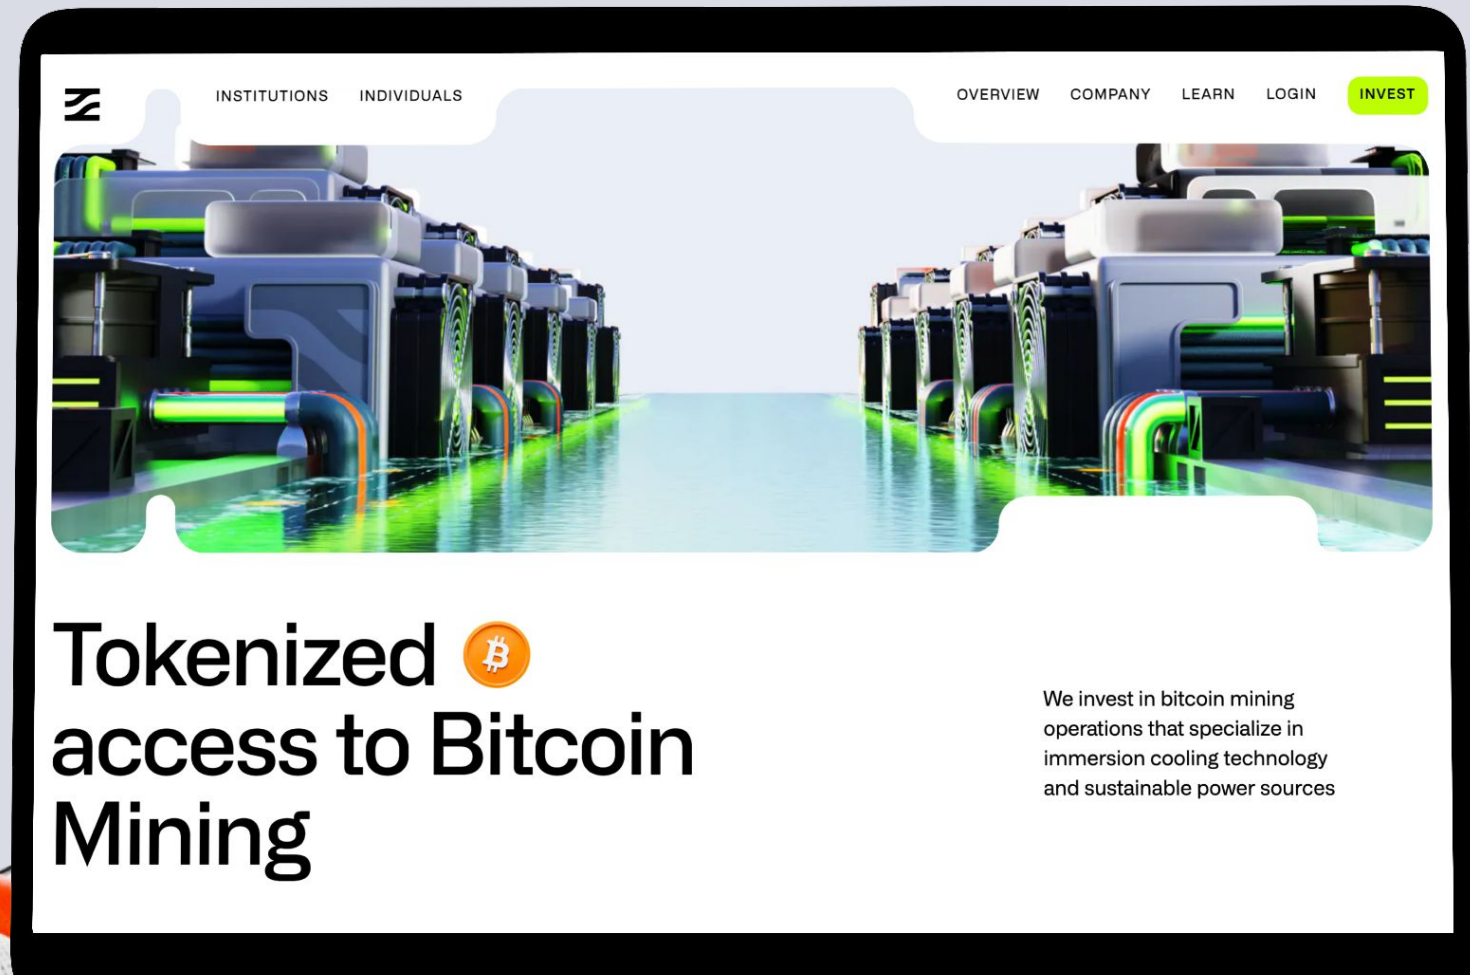

liquidmining.fund

Liquid Mining Fund (\$LMX) is a fully tokenized special-purpose vehicle that provides investors exposure to Bitcoin mining, focusing on immersion cooling technology and sustainable power sources such as hydroelectric.

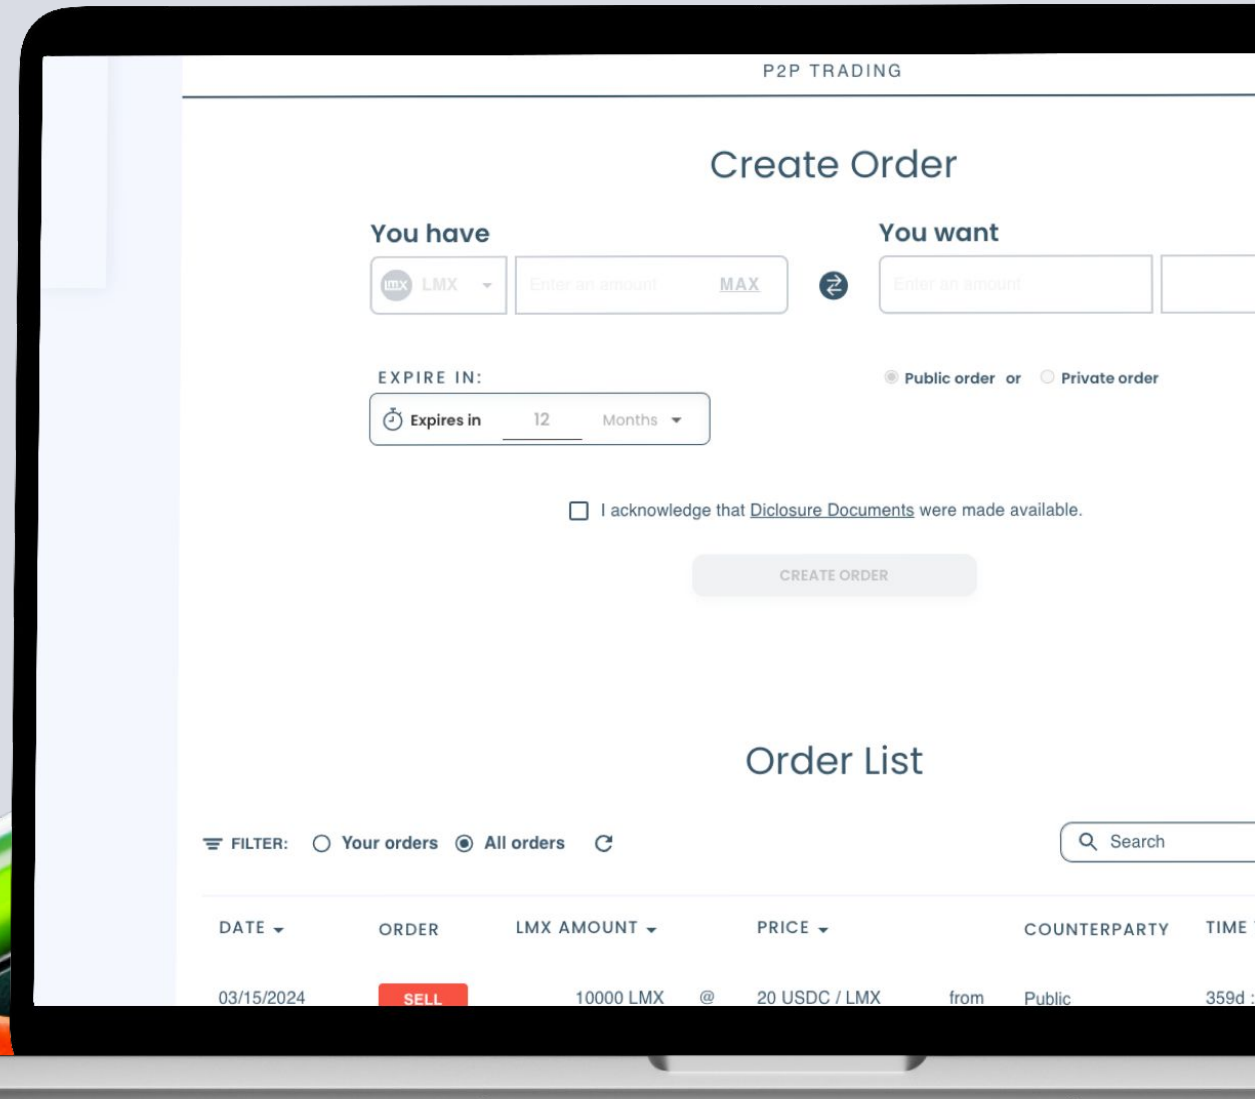

liquidmining.fund

\$LMX P2P Marketplace

A P2P marketplace for the Liquid Mining Fund (\$LMX) on the Realio Platform that facilitate direct transactions and interactions between LMX holders.

- Functioning as an OTC market
- Being non-custodial and not having deposits or escrow, every transaction is peer-to-peer with no counterparty risk, no intermediating participants
- With transparent pricing, the price shown by the seller is the price you get, without slippage, front running, or price manipulation
- Flexible swaps enable that each swap is between two parties, two tokens, and a smart contract, meaning any standardized digital asset can be swapped at a custom price and at any size

A non-custodial, multi-chain DeFi wallet app

Our infrastructure is a hybrid design that builds transactions with complexity seamlessly, while giving control of private keys to users, making it manageable on any device without storing the keys on an unsecure mobile phone.

Earth's Digital Twin

Districts is a virtual world mirroring Earth, offering an innovative avenue for everyone to own, build, and earn from virtual land while shaping the cities of the future. We will provide creative professionals and real estate enthusiasts with cutting-edge tools and collaborative spaces to push the boundaries of digital design.

Through the power of decentralized technology combined with our unique 'Land Bank' mechanism, we will create new investment opportunities, fostering a dynamic digital economy.

The screenshot shows the Districts website interface. At the top, there are navigation links for "Districts" and "Marketplace", a search bar, and utility icons for a search filter, a notification bell, a wallet with 285 units, and a user profile icon labeled "BS". The main area is a map of New York City with a hexagonal grid overlay representing virtual parcels. A pop-up window for the "New York City Fire Museum" is open, showing its address (278 Spring St, New York, NY 10013), coordinates, and a 3D model of the building. Below the model, it lists the owner as "0xFE...3dB8" and the auction end time as "2D:4H:32S". A prominent "Place a bid" button is visible. At the bottom of the pop-up, a "Parcel Chart" shows a price of "2,500.88" with a green upward arrow and "+4.7%", and a secondary price of "\$2,252.41". A line graph below the chart shows price activity over time, and a "Show Land Activity" dropdown is at the bottom.

Land Sale Progress

Districts will launch with LandRush event, where virtual parcels will be available to claim.

We will gradually unveil Districts, based on fair voting mechanisms.

Realio Platform

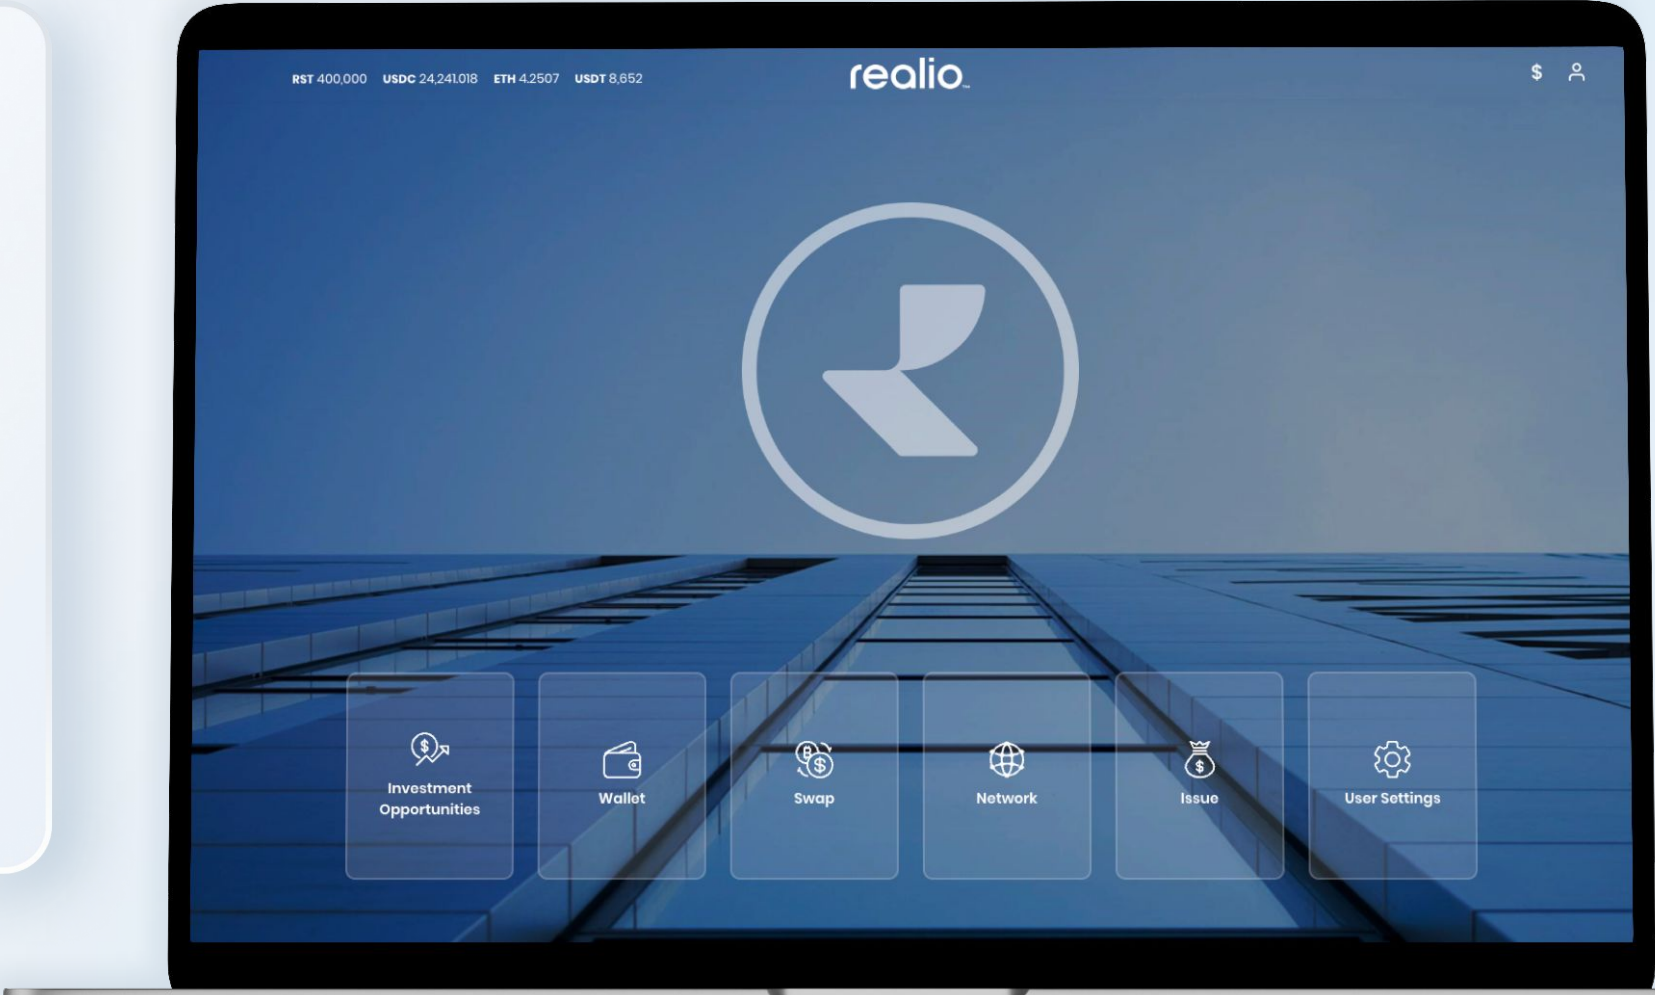

Enhancements

Investment Platform Overview

app.realio.fund

The Realio Investment Platform utilizes blockchain technology to offer a range of services, including tokenization, digital asset issuance, and secondary market trading. It provides asset owners the ability to create and manage digital securities and allows investors to trade those securities on a secondary market.

Identity Verification

app.realio.fund

In our continuous effort to comply with regulatory standards and elevate our platform's security, we have updated our KYC partner in the Realio Investment Platform.

Identity Verification is required for anyone who wants to interact with regulated functions and tokens.
